# TJUGOSJUNDE BANDETS INNEHÅLL

| | | Sid. |
|---|---|---|
| 1. | Åkermark, B. and Johansson, N.-G., Studies on the chemistry of lichens. 25. A stereospecific synthesis of (±)-roccellic acid | 1– 10 |
| 2. | Åkermark, B., Studies on the chemistry of lichens. 26. A stereospecific synthesis of (±)-norrangiformic acid | 11– 17 |
| 3. | Bonner, F. J., Fractionation by thermal diffusion under conditions of poor solubility | 19– 31 |
| 4. | Thunell, S., A micro procedure for the study of depolymerisation of glycosaminoglycans by testicular hyaluronidase | 33– 44 |
| 5. | Thunell, S., A micro procedure for quantitative determination of hyaluronic acid, heparan sulfate, chondroitin sulfate and dermatan sulfate in mixtures | 45– 57 |
| 6. | Ahlberg, P. and Bergson, G., Tautomerism in substituted benzofulvenes | 59– 64 |
| 7. | Bendz, G., Mårtensson, O. and Nilsson, E., Studies of flavylium compounds. I. Some flavylium compounds and their properties | 65– 77 |
| 8. | Dyfverman, A., Determination of lead in biological material by dithizone. Interferences from other ions | 79– 85 |
| 9. | Rodmar, B. (née Mattiasson), Rodmar, S., Ali Khan, A. and Gronowitz, S., Proton magnetic resonance of pyrimidines. III. Signs of proton spin couplings | 87– 96 |
| 10. | Bonner, F. J., Thermal diffusion measurements with a moving-boundary technique and the thermal diffusion of polyisobutylene in n-octane | 97–113 |
| 11. | Bonner, F. J., Thermal diffusion measurements on polystyrene in toluene | 115–118 |
| 12. | Vesterberg, O. and Berggren, B., Studies on yeast β-fructofuranosidase (invertase). XXI. Studies on enzyme preparations by isoelectric focusing in a pH gradient | 119–127 |
| 13. | Bonner, F. J. and Luisi, P. L., Thermal diffusion measurements of stereoregular poly-α-olefins in isooctane | 129–137 |
| 14. | Bonner, F. J., Thermal diffusion coefficients for polystyrene in cyclohexane in the presence and in the absence of secondary interfaces | 139–144 |
| 15. | Gronowitz, S. and Hansen, G., Optically active bithienyls. VIII. On the synthesis of 3,3′, 6,6′-tetramethyldiphenic acid | 145–151 |
| 16. | Gronowitz, S. and Hagen, S., Optically active bithienyls. IX. On the synthesis of 2,2′-dicarboxy-4,4′-dimethyl-3,3′-bithienyl and 4,4′-dicarboxy-2,2′-dimethyl-3,3′-bithienyl | 153–158 |
| 17. | Wettermark, G., Substituent effects in the *cis-trans* isomerization about the carbon nitrogen double bond | 159–166 |
| 18. | Fischmeister, I., Infrarotspektren sämtlicher stellungsisomerer Monohydroxy- und Monoketooktadekansäuren und deren Methylester. III. Monohydroxyoktadekansäuren und -methylester | 167–196 |
| 19. | Skancke, A. and Kierkegaard, P., X-ray studies of some wolfram oxide phosphate glasses | 197–212 |
| 20. | Enzell, C. R. and Ryhage, R., Mass spectrometric studies of diterpenes. 5. Aromatic diterpenes | 213–229 |
| 21. | Odham, G., Synthesis of methyl 2D, 4D, 6D-, 2D, 4L, 6D-, 2L, 4D, 6D- and 2L, 4L, 6D-trimethylnonanoate | 231–250 |
| 22. | Odham, G., Studies of feather waxes of birds. V. Note on the steric configuration of the 2,4,6-trimethylnonanoic acid present in the preen gland wax of several species of waterfowl | 251–255 |

23. Carter, R. E. and Dahlgren, L., The synthesis of some highly substituted benzene derivatives and several new biphenyls . . . . . 257–262
24. Odham, G., Studies on feather waxes of birds. VI. Further investigation of the free flowing preen gland secretion from species within the family of Anatidae . . . . . 263–288
25. Odham, G., Studies on feather waxes of birds. VII. A comparison between the preen gland wax of the Peiping duck and its wild ancestor, the mallard . . . . . 289–294
26. Odham, G., Studies on feather waxes of waterfowl . . . . . 295–307
27. Lodhi, M. A., On extraction with long-chain tertiary amines. VII. Extraction of hydrobromic acid by trilaurylamine dissolved in *o*-xylene 309–324
28. Nygård, B., Polarographic investigations of organic selenium compounds. II. The polarographic behaviour of some $\omega,\omega'$-diselenodialkanoic acids . . . . . 325–339
29. Nygård, B., Polarographic investigations of organic selenium compounds. III. Polarography of selenocystine-selenocysteine . . . . . 341–361
30. Dagerhamn, T., X-ray studies on the yttrium-aluminium system . . . 363–380
31. Andersson, M., Some unsymmetrically substituted phenoxyacetic and $\alpha$-phenoxyisobutyric acids . . . . . 381–392
32. Flynn, K. G. and Bergson, G., Rearrangements of some dihydroanthracene derivatives . . . . . 393–403
33. Nygård, B., Polarographic investigations of organic selenium compounds. IV. The polarographic behaviour of some five- and six-membered cyclic diselenides . . . . . 405–424
34. Nygård, B., Polarographic investigations of organic selenium compounds. V. A polarographic study of some oxidation products of five-membered cyclic diselenides and disulphides . . . . . 425–445
35. Zdansky, G., Monomethyl-substituted methionines and selenomethionines with the methyl group in $\alpha$, $\beta$ or $\gamma$ position . . . . . 447–452
36. Danielsson, L., The separation of traces of elements from large amounts of iron by anion exchange . . . . . 453–458
37. Danielsson, L., Anion exchange study of some elements strongly adsorbed from sulphuric-hydrofluoric acid mixtures . . . . . 459–466
38. Danielsson, L., Studies of ion exchange separations with particular reference to the analysis of iron and steel . . . . . 467–483
39. Hedlund-Stoltz, I., Studies on optically active carbonyl-conjugated monounsaturated long chain compounds . . . . . 485–505
40. Myrbäck, K., Studies on yeast $\beta$-fructofuranosidase (invertase). XXII. The reaction with the zinc ion, $Zn^{2+}$ . . . . . 507–514
41. Björk, W., Interactions of snake-venom phosphodiesterase with DNA and DNA fragments . . . . . 515–538
42. Björk, W., Specificity studies on two endonuclease fractions from potato tubers . . . . . 539–554
43. Björk, W., Activation of snake-venom 5′-nucleotidase, and its analytical use in determinations of AMP and 4-amino-5-imidazolecarboxamide ribotide synthesized by a nucleotide pyrophosphorylase . . . . . 555–569
44. Olsson, K. and Almqvist, S.-O., Polythiaadamantanes. V. Some methyl derivatives of 2,4,6,8-tetrathiaadamantane . . . . . 571–615
